How to Clean the Inside of a Laser Printer - How to Clean the Inside of a Laser Printer by viandant5 240,595 views 3 years ago 4 minutes, 18 seconds - Over time, **laser printers**, can become dirty due to excess toner leaking out of the cartridges. This video explains how to clean the ...

First of all turn off the printer

Remove the toner cartridge and the drum unit

The drum is often built into the toner cartridge

Keep the drum in a dark place the light may damage it

Here's what the drum looks like

A laser printer uses powdered toner in the print process
you need alcohol and a clean cloth

The average vacuum cannot filter toner dust effectively

Do not use compressed air or canned air

and the dust could fly all over the printer

and inside the scanner unit causing more problems

Don't use flammable substances or any type of spray

Remove the spilled toner and the dust

Toner is likely to build up under the cartridge housing

To clean parts that are difficult to reach use a paintbrush

To clean the electronic contacts isopropyl alcohol is ideal

Alcohol is great for dissolving grease, and oil
to remove built-up toner and the dust
Clean the paper pick-up roller with a soft dry cloth and alcohol
The rollers might be near the paper tray
Clean the transfer roller (the foam roller near the drum)
Clean the glass of the scanner unit with a cotton cloth
You can use normal glass cleaner or alcohol
Remove the paper tray
in this case you can use a normal vacuum

How to clean a Printer Transfer Roller - How to clean a Printer Transfer Roller by viandant5 400,641 views 5 years ago 3 minutes, 55 seconds - Symptoms of a defective Transfer Roller are: - Squealing or screeching noises - Frequent paper jams - Light print - - Streaks or ...

The printer transfer roller is responsible for pulling toner from the OPC drum and onto the paper
The transfer roller places a positive charge
This positive charge causes the negatively charged toner is transferred to the paper DRUM

Cleaning the transfer roller
The transfer roller is a black spongy roller
the transfer roller is inside the drum unit
Squealing or screeching noises
can also be a sign of issues with the transfer roller
a light printing could indicate a dirty transfer roller
may also indicate a positioning problem TEST PRINT
The roller may be too far away from the paper
are a sign of a dirty roller surface
Repeating spots at the same distance of the circumference
and disconnect it from the wall outlet
Remove the toner cartridge
Wipe the roller with a soft dry cloth
using the drive gear on its end
Turn the roller until the entire surface is clean
Do not apply too much pressure
don't touch the roller with your fingers

Allow the roller to dry before you restart the print job

you can use compressed air to blow dust away

the roller is defective and must be replaced
