Bulk Material Handling

Tens of thousands of mechanical engineers are engaged in the design, building, upgrading, and optimization of various material handling facilities. The peculiarity of material handling is that there are numerous technical solutions to any problem. The engineer's personal selection of the optimal solution is as critical as the technical component. Michael Rivkin, Ph.D., draws on his decades of experience in design, construction, upgrading, optimization, troubleshooting, and maintenance throughout the world, to highlight topics such as:

- physical principles of various material handling systems;
- considerations in selecting technically efficient and environmentally friendly equipment;
- best practices in upgrading and optimizing existing bulk material handling facilities;
- strategies to select proper equipment in the early phases of a new project.

Filled with graphs, charts, and case studies, the book also includes bulleted summaries to help mechanical engineers without a special background in material handling find optimal solutions to everyday problems.

Snowmobile Service Manual

The manual contains separate sections for vehicle service, engines, converters, track drive, track and suspension, and skis and steering.

Talking Up

What drives young women and what drives them mad? Twentysomething women talk about their feminism. What they do, how they do it and why they choose to do it as feminists. Exploring a range of personal and political experiences, this collection defines the landscape in which young women stake their claim to feminism. The private collides with the public, anger with humour, desire with ideals. Writing themselves into the debate, these young women are 'talking up'. Covering a diversity of themes including relationships between older and younger women (and feminists), experiences of young migrant women, feminist activism, the marginalisation of non-white and lesbian women, the emerging role of young women in corporate, legal and educational institutions. Although young women have been publicly silent, they are neither indifferent, nor dispassionate about feminism. This book shows the diversity and depth of young women's ideas.

Historic Highways of America

This book tells the remarkable history of an Alfa Romeo Monza and its characterful drivers and owners, some with life stories worthy of a movie script. Built in 1933, '221130' was raced that year by the Hon. Brian Lewis and won its debut at Brooklands and the arduous Mannin Moar race on the Isle of Man. The car continued to be raced until the war by John Cobb (1934) who later was a land speed record holder, Luis Fontes (1935) who was also an aeroplane racer, Anthony Powys-Lybbe (1936–37) and Fay Taylour (1938) who was interned during the Second World War for her Fascist links, at venues as diverse as Vila Real (Portugal) and Phoenix Park (Ireland). Post-war, a succession of notable owners included Peter Hampton, the Hon. Patrick Lindsay and Hubert Fabri, all passionate collectors, to arrive at its status today as one of the more important surviving Monzas, and a car with so much charisma and historic interest that it is a most worthy addition to the acclaimed 'Great Cars' series

The 101 Automotive Jewels of India

The First Three Shelby Cobras, the third book in the acclaimed Exceptional Cars series, tells the story of three remarkable cars, the first AC Cobras created by the legendary Carroll Shelby in 1962 and now favorites of sports-car enthusiasts throughout the world. The prototype CSX2000 has been described as the "most important American car", although it was built on a British AC Ace chassis with an American Ford V8 engine. It was retained by the Shelby family until 2016, when it sold at auction for a record \$13.75 million. CSX2001 was the first production Cobra, and was delivered to American racing driver Ed Hugus. It was later sold to Frenchman Jean-Marie Vincent, who raced in the Tour de France and in numerous European hillclimbs. CSX2002 was the first Cobra to race and nearly won its inaugural outing at Riverside, driven by Bill Krause, until sidelined by a broken rear hub. It did take the first ever Cobra win, with Dave MacDonald at Tucson in March 1963. Its success led to a series of competition wins that made Shelby's Cobras famous and admired across the globe. All three cars are now the pride of car collections in the United States of America. CSX2000 and CSX2002 are part of the Larry Miller Collection, and CSX2001 belongs to California-based motorsport aficionado Bruce Meyer.

Speaking all over the United States about apologetics issues, Charlie Campbell has heard just about every question skeptics have to offer. In this concise, reader-friendly handbook, he provides brief responses to the top-40 questions that keep people from the faith, such as... What evidence do you have that God exists? How do you know the Bible is actually true? What about those who have never heard of Jesus? Will they be condemned to hell? If God is so loving, why does He allow evil and suffering? How can you say Jesus is the only way to heaven? Don't all religions basically teach the same thing? Aren't a lot of churchgoers hypocrites? With a gracious introductory note to skeptical readers and a generous sprinkling of inspiring quotes throughout, this handy resource is an enjoyable read as well as a powerful evangelistic tool.
