The story of how plants and flowers have shaped interior design for over 200 years From ferns in 19th-century British parlors to contemporary \"living walls\" in commercial spaces, plants and flowers have long been incorporated into the design of public and private spaces. Spanning two centuries, Nature Inside explores the history and popularity of indoor plants, revealing the close relationship between architecture, interior design, and nature. Studying the international modern interior through the lens of plants in the human environment, author Penny Sparke attributes a degree of the interest in indoor plants to urbanization, and, more recently, the climate crisis, which serve as ongoing reminders that people must maintain a connection to, and respect for, the natural world. While architectural and interior design styles have evolved alongside the popularity of various plant species, the human need to bring nature indoors has remained constant.

Course Notes

With contributions from leading brand experts around the world, this valuable resource delineates the case for brands (financial value, social value, etc.) and looks at what makes certain brands great. It covers best practices in branding and also looks at the future of brands in the age of globalization. Although the balance sheet may not even put a value on it, a company's brand or its portfolio of brands is its most valuable asset. For well-known companies it has been calculated that the brand can account for as much as 80 percent of their market value. This book argues that because of this and because of the power of not-for-profit brands like the Red Cross or Oxfam, all organisations should make the brand their central organising principle, guiding every decision and every action. As well as making the case for brands and examining the argument of the anti-globalisation movement that brands are bullies which do harm, this second edition of Brands and Branding provides an expert review of best practice in branding, covering everything from brand positioning to brand protection, visual and verbal identity and brand communications. Lastly, the third part of the book looks at trends in branding, branding in Asia, especially in China and India, brands in a digital world and the future for brands. Written by 19 experts in the field, Brands and Branding sets out to provide a better understanding of the role and importance of brands, as well as a wealth of insights into how one builds and sustains a successful brand.
